# WHAT'S NEW?

## INTRODUCING CAFE BRAND'S NEW BELLA POTS

Made from renewable plant-based PLA, these sturdy, clear pots – available in 8, 10, 12 & 16oz – are perfect for granola and yogurt, mixed salads, or cole desserts.

On-pack eco messaging in green and Cafebrand's Green Leaf tab showcase their compostable credentials.

Fits our 3oz insert for a food combo and our 96-Series lids for food on the go. The options are endless!

## PAPER STRAWS

Premium quality made from 100% sustainably sourced paper.

Available in a variety of sizes, designs and colours to sip and slurp your cold drinks, cocktails, smoothies and thick milkshakes.

Page 19

## HULA PAPER COLD CUPS

Say aloha to Cafebrand's paper cold drink cups.

Vibrant coloured cups – mixed within each sleeve – compatible with our cold cup lids.

## PLA FOOD BOWLS

Part of our Bon Appetit mix & match range. Clear visibility for cold foods, with a ribbed design for easy grip to serve & carry. Made from renewable plant-based PLA.

Page 23

Page 39

## KRAFT FOOD TRAYS

Our new food trays are perfect for serving warm savoury street food or sweet treats. Made from clay-coated paperboard, food safe and grease resistant.

## SINGLE SANDWICH WEDGE

The single sandwich wedge is a new addition to our sandwich range – perfect for soup & sandwich combos. The full range has a unified kraft look and features our award-winning Green Leaf band design.

Page 34

# GREEN TREE SANDWICH WEDGES

Our Green Tree sandwich wedges feature crisp white design with onpack messaging in Cafebrand's green.

Page 46

Page 20

# GREEN CPLA CUTLERY

A new range of lightweight compostable cutlery in unmistakable green! Slightly shorter and more compact than our standard sets, these utensils are just as sturdy and functional.

# MEET OUR NEW BAGS!

We have a newly designed plant-based carrier bag, two new greaseproof PLA window bags, two classic white glassine no-windowed bags and three Therma bags.

# Cafebrands

## TRIED, TESTED & TRUSTED

Our plant-based disposables can break down in under 12 weeks in commercial composting.

We hold the deepest set of compostability certification in the packaging sector, and we conduct field trials to ensure our products break down in a variety of composting facilities around the world.

### PAPER & CARD

Sustainably sourced, using recycled content where we can.

### PLA & CPLA

Strong & light. Plantbased. Clear PLA for cold use, CPLA for hot.

### natureflex

Clear film made from wood pulp. Anti-grease, heat sealable.

### BAGASSE

Reclaimed sugarcane. Sturdy & practical, for hot and cold use.

### PALM LEAF

Fallen, pressed Areca leaves. Unique eco style.

### inks

Vegetable or water-based, with a great print finish.

We are updating the Green Leaf band design on our stock lines. Paper-based products will now feature the band as a vertical design.

## **WHAT IS THE GREEN LEAF BAND?**

We are committed to waste management and producer responsibility. Experience has highlighted the critical role on-product messaging plays in reducing contamination. The Green Leaf band unifies our products and provides a visual prompt that can be used on other resources like bins and bin signs.

## **WHY THE CHANGE?**

The sleek new vertical design provides a crisp minimalist look, while still letting end-users know they're getting an eco-friendly product.

# HOT CUPS

Cups made from sustainably-sourced board and lined with renewable plant-based PLA. Double wall cups can be supplied with a full colour custom print and lead time of 3 weeks for a MOQ of just 5,000 cups. The Series number helps you choose the right lid.

01VWSALAD	32oz large window salad box	300

# FOOD CARTONS

Versatile kraft board cartons with a compostable grease-resistant lining. Leakproof webbed corners and fold in flaps give a secure closure. Perfect for either hot pies or pasta dishes. Our noodle boxes are also great for hot street food to go.

Code	Product	Case count
1669	No.1 food carton 700ml (11 x 9 x 6.5cm)	450
1670	No.2 food carton 1500ml (19.5 x 14 x 5cm)	280
1672	No.3 food carton 1800ml (19.5 x 14 x 6.5cm)	180
1673	No.5 food carton 1050ml (15.2 x 12.1 x 5cm)	150
1671	No.8 food carton 1300ml (15 x 12 x 6.5cm)	300
VNB32	32oz kraft noodle box	400

# SHEETS

Greaseproof paper sheets to wrap or line your hot or cold food to go. Check out our stylish bakery, grill or Green Tree collection designs, or choose plain white, unbleached kraft brown or create your own with our custom print service! For cold food, our clear PLA sheets offer great visibility and freshness.

Code	Product	Case count
VGNSH2	300 x 400mm clear PLA sheet	1000
VGGSH2	350 x 225mm 30gsm greaseproof sheet	1920
VGGSH3	430 x 350mm 30gsm greaseproof sheet	960
VGKSH3	300 x 275mm 50gsm unbleached greaseproof sheet	500
VGKSH4	380 x 275mm 50gsm unbleached greaseproof sheet	500
VWBRST	Wax coated 28gsm burger wrap (250 x 330mm)	960
VGGSH-BAKERY	Bakery greaseproof brown & white, 300 x 400mm	1000
VGGSH-GRILL	Grill greaseproof black & white, 300 x 400mm	1000

# HOT BAGS & WRAPS

Innovative eco solutions for hot food to go. Glassine bags with compostable windows offer fantastic visibility in hot cabinets, or opt for a classic non-windowed bag. Our new Therma bags are designed to keep food crisp, hot and delicious. Our ovenable wrap is one single item to cook, store and serve hot wraps. Both hot wraps have perforated lines to tear and tuck whilst keeping them intact.

Code	Product	Case count
VGLW4	4 x 2 x 10in glassine bag with NatureFlex window	1000
VGLW6	6 x 2.5 x 10in glassine bag with NatureFlex window	500
VOW-GP1	11 x 2.5 x 8in ovenable wrap	500
VHC-GP3	8 x 2 x 9in Therma pouch	500
★ VHC-GB4	4 x 2 x 14in Therma paper bag	500
★ VHC-GB5	5 x 2 x 11.5in Therma paper bag	500
★ VHC-GB6.5	6.5 x 3 x 9in Therma paper bag	500

★ New!

# Composting FAQ

**Single-use:** We all know the challenges, but let's explore a compostable solution. Even with a major shift to reusables, some disposables will always be needed. By choosing compostables, foodservice businesses can actively drive change in Irish recycling. Here's why businesses should consider going compostable.

## What's the point of disposables being compostable?

Compostable disposables are designed to be recycled in an industrial composting facility together with food waste. That means there's no need for sorting, and the compostable cup, lid, burger box, knife and napkin can all go together without removing the ketchup and leftover chips. An extra bonus is that once food and disposables share one bin, other dry recycling bins are cleaner and easier to recycle.

Compostability isn't best for all situations. For example, we wouldn't make compostable water bottles, as PET plastic already has a developed recycling infrastructure. But for food-contaminated disposables, compostability is a sensible solution.

## How do compostables solve food contamination?

Combining plastic and card in foodservice packaging creates massive recycling challenges, as highlighted by the recent coffee cup recycling debate. Food contamination is inevitable, so the result is incineration or landfill. For disposables destined for serving food, it makes sense to use materials that can be recycled *together with food*. With compostable disposables, food isn't contamination, it's a vital ingredient in the composting process.

What's the learning here? That in reality, card + plastic + food isn't recyclable.

## What are our products made from?

We make catering disposables from plants, not plastic. After use, they are designed for industrial composting with food waste. We replace conventional plastics with various plant-based materials. For example, PLA is a compostable material made from plants. PLA replaces the plastic in coffee cup linings or sandwich windows, and it's the clear material in our cold cups and deli containers. Our hot cup lids and cutlery are made of a high-heat version of PLA.

Recycled sugarcane fibre is another practical material we use for our clamshells, plates and bowls. Known as bagasse, it performs really well, keeping heat in but not trapping condensation. Plus, it's renewable, a recycled by-product of the sugar industry.

## Do plant-based materials work as well as plastic?

Absolutely. In the early days there were limitations, but not any more. Cafés can be confident that their plant-based disposables will function perfectly. We only use water-based or vegetable-based inks for our custom printing, and the print finish is great.

## What's the difference between *biodegradable* and *compostable*?

Same process, different breakdown speeds. Forget the term *biodegradable*, as it tells us nothing about timescales (wood is *biodegradable*, but a log cabin can stand for generations). *Compostable* means something can break down in under 12 weeks and is therefore suitable for industrial composting. Make sure your disposables supplier has compostability certification – that's the real guarantee.

## What are composting conditions?

Compostable packaging needs to be in composting conditions in order to compost. Industrial composting creates the perfect balance of microbes, moisture and warmth, so that compostable packaging can be included in food waste recycling. Home composting conditions vary with the skill of the householder, so we don't make any claims there, but there have been successful trials using hot compost bins.

## What's the point if I can't compost it?

The earth has finite resources. Disposables are used for such a short time, so it makes sense to switch to renewable materials, reserving conventional plastics for applications where they can't be easily replaced. Lots of people enjoy using plant-based materials, knowing they are a simple way to reduce carbon and help their business go green.

*But here's the exciting part.* When the Wright brothers invented the aeroplane, there were no airports, and look at air infrastructure now. By choosing compostables, foodservice businesses can actively drive changes in our recycling. The more compostables there are in use, the more we can work with the waste sector to extend collections countrywide.

**Compostables are the only practical solution for food-contaminated disposables. The more businesses that go compostable, the faster we can achieve this much-needed change.**

## CAN'T FIND COMPOSTABLE WASTE COLLECTION SERVICES IN YOUR AREA?

Cafebrands has teamed up with bio processing experts - PRM Waste Systems - to offer an **easy, ecological and cost-effective** method for disposing of food and packaging waste onsite. This closed loop solution sidesteps alternative waste collection services that may or may not be offered in your area.

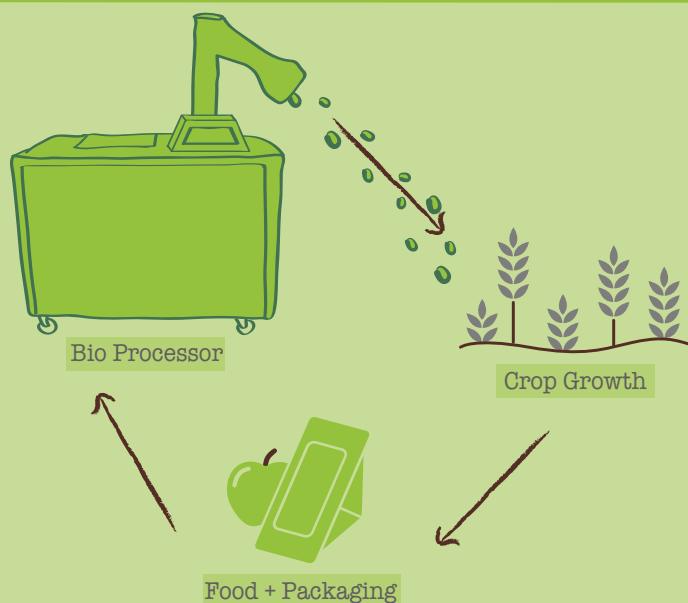

## HOW DOES IT WORK?

PRM have developed a range of brilliant bio processing units (about the same size as a large wheelie bin / skip) that break food and compostable packaging down into a soil enricher which can then be used to grow more crops, or produce a supplementary biomass fuel.

## WHAT ARE THE BENEFITS?

The units are so effective that they can **reduce waste by up to 80% over a 24 hour period**. They LOVE compostable packaging too as it improves the structure of the soil enricher by introducing more oxygen into the mix. What's more, where most waste collection operators accept around 25% packaging waste maximum (with 75% food waste), **PRM's units can process up to 40% packaging waste** in one go.

- No waste collection services required – everything is done onsite offering a more cost-effective, closed-loop solution.
- No need to separate waste – compostable packaging and food waste all go in together.
- Depending on the waste your business produces, the end product (digestate) could be used as a fertiliser or a biomass fuel. It may also be sent to a biorefinery (to be turned into energy) or used in compost production.
- Even if your catering operation can't use digestate onsite (you might not have access to a garden or other outside space), both the volume of waste and the frequency of collections required will be much reduced, further driving down costs.

Equipment Based Solutions

# LIDS, LITTLE PIGS & PASSWORD PROTECTION

The PRM Bio-Processors are very simple to use. They are top loading with a push button controlled lid, you simply add your waste and close.

Inside waste materials are broken down aerobically - with oxygen - and by tiny microbes affectionately named 'little pigs' due to their outstanding appetites. The little pigs are harmless to humans, but inside the unit where the conditions are just right, they'll munch through just about anything organic.

The processors also have a simple but very clever display panel that keeps you updated as to everything that's going on inside. This can even be linked to your phone so you can still keep an eye on everything while off-site. The panel also allows the unit to be fully password protected so it remains accessible to your staff and your staff only!

## THE ALTERNATIVES

While eco collection services are offered in some areas, much of Ireland is still without commercial options. Therefore, processing waste onsite remains the only way to ensure packaging and food waste are dealt with responsibly.

A range of sizes are available to lease or purchase depending on what works best for you. Please contact us for further information or if you would like to discuss the possibility of sharing a unit with a likeminded local company.

For further information regarding the Bio Processors, please call **01 685 4351** or email **info@cafebrands.ie**

If an onsite unit does not work for your business, Cafebrands has also partnered with compostable collection providers in some parts of the country. Please do get in touch if we can provide info: email **info@cafebrands.ie** or call **01 685 4351**

# SOFTWARE

## LabelLogic

Market-leading software that makes sense

LabelLogic is CafeBrand's market-leading software, specifically designed for overprinting labels. It is a simple but effective program that enables you to label products quickly, efficiently and with style, whilst complying with legislation.

LabelLogic comes free on loan\* and is supported by a help line, available for all customers. Our support team are on hand to offer you assistance with: maintenance, upgrades, changes and any advice you might ever need for your labelling software, and it's all provided free as part of the service!

### LABELLOGIC FEATURES INCLUDE:

- Ability to add your own logo
- Ability to handle allergen information
- Recipe builder for Q.U.I.D.S (Quantitative Ingredient Declarations)
- Link to NutriLogic® Plus
- Ability to add 8 and 13 digit bar codes, for quick and accurate sales analysis
- Preset images including litter man and recycling
- Ability to access data on a shared network
- Ability to add health or dietary messages e.g. Vegetarian or Halal
- Easy to understand userguide and tutorials
- Manage a library of print files
- See your label on screen while you type
- Automatic sizing and spacing

\* LABELLOGIC® is provided free on loan under licence from CafeBrands solely for use with labels supplied by CafeBrands. Certain initial minimum orders may apply. LABELLOGIC® is a registered trademark of CafeBrands.

SYSTEM REQUIREMENTS ARE:  
Windows 2000 / XP / Vista / 7  
150Mb Free Hard Disk Space  
256Mb RAM

Please note that we cannot support LabelLogic and NutriLogic on Windows 95/98/ME. For more details please visit our FAQ page on our website, <http://www.cafebrands.ie>

# Cafebrands

Unit 34 • Premier Business Park • Ballycoolin Road • Dublin 11

## SOFTWARE

# NutriLogic® Plus

Instant nutrition analysis from CafeBrands

NutriLogic® Plus is a simple and effective program that does all the hard work for you. You create the recipes and NutriLogic® Plus works out the nutritional values. Providing you with the tools to fully inform your customers, promote a professional image and support any nutrition claims made.

The NutriLogic program is a database using the "McCance & Widdowsons - The Composition Of Foods" which contains over 1,200 of the most commonly consumed foods in Ireland and the UK. The program allows you to create recipes by selecting the ingredients and then inputting the weight of each ingredient that you are using for each of your products. NutriLogic will then calculate the full nutritional breakdown, quantitative ingredients and also allergen information. This can easily be transferred into the LabelLogic program to print on your labels. Once set up, if you change an ingredient in NutriLogic, the nutritional and ingredient boxes in LabelLogic update automatically.

#### INSTANT NUTRITION ANALYSIS ON YOUR OWN PC:

- Link to LabelLogic for fantastic looking labels
- Simple 'drag and drop' usability
- Save time and money – no need for expensive laboratory analysis
- Simple calculation of ingredient percentages (Q.U.I.D.S)
- Supplied with an extensive database in conjunction with Food Standards Agency and the Institute of Food Research
- Free support and upgrades

For advice on the legal requirements and regulations for food labelling please check with the relevant organisations.

If you have any further software enquiries please contact us on the number below.

Name: NutriLogic® Plus  
Supplied on: CD ROM  
Code: NLP001
